COTTON. Our weekly review of the cotton market at the close of the last commercial week quoted middling cotton in New York at 11%c, it advanced to 12.3 fbc; New Orieans quoted 11%c, advanced to 11%c; Liverpool 6.3-16d, advanced to 6.5-16d. Memphis quoted 11%c, advanced to 11%c. This statement shows that cotton has been advancing during the whole week; the whole week the hells have whole week; the whole week the bulls have possession of the New York market, and, whether Liverpool was with them or not, have continually urged the market upward. Their strength has been in the reduction of stocks and the expectation that the demand will tread closely on the heels of the supply before the new crop comes in. In our mar-ket the stock is considerably less than half the amount we had this time last year, and the sale of a good deal of cotton is lost daily from inability to supply the demand. New Oreans, it will be observed, falls behind in orices, this is because her customers lie among the exporters and, at present rates in New York and Liverpool, they can do nothing. Our prices are above theirs, for we are most influenced by New York, they by Liverpool. The New York Balletin, of Fr.day, said: "A continued firm and buoyant tone prevailed, with a further gain on values all around.
The demand for spots, 'n particular, gave encouragement, as it included a steady movethe orders from exporters, which makes a reduction of stock, tending to greatly strengthen the position of holders should the business progress much further. On prices there has been an advance of 1-16c per pound, with a further addition of make by a general attendance of buyers. For future delivery the market was again a little steamy, with a further addition to value and a pretty good limiter addition of the properties, which makes a reduction of \$20832 20139 520055 492773 485789 4650554 4205054 420 little steamy, with a further addition to value and a pretty good business done. The cable, as before, furnished the main basis for advance, as Liverpool kept on the upward turn and appears a little excited. A local influence, however, was to be found in the strong condition of the spot market and the announced purchases for shipment, besides which it is rumored that exporters are taking July notices freely when offered, and that they warmed for the strong legislating annuals. as before, furnished the main basis for adwhich it is rumored that exporters are taking July notices freely when offered, and that they purpose forwarding considerable amounts during the coming month. The effect of this is particularly marked on the reduction of the margin between July and August contracts, the former month going up 10 points to the latter's 5@6 points, and showing the greatest strength throughout.
